CODE	ONE-LINER	CATEGORY
`/ghost`	Strips AI tells from writing — reads human	Writing & Style
`/punch`	Every sentence shorter, leads with verbs	Writing & Style
`L99`	Commits to opinions, stops hedging	Thinking & Reasoning
`ULTRATHINK`	Maximum reasoning depth	Thinking & Reasoning
`/debug`	Finds the actual bug in your code	Coding & Technical
`ARCHITECT`	Designs system structure before coding	Coding & Technical
`/godmode`	Most detailed, longest possible response	Power Commands
`PERSONA`	Responds as a specific expert (specificity is key)	Power Commands
`/nofilter`	Strips diplomatic instinct, real opinions	Hidden Modes
`BEASTMODE`	Maximum quality output, 3x effort	Hidden Modes
`ARTIFACTS`	Output as numbered deliverables	Output Formatting
`/table`	Forces table format	Output Formatting

`DEEPDIVE`	Exhaustive analysis, not overview	Research & Analysis
`/decision-matrix`	Weighted scoring matrix	Research & Analysis
`/tldraw`	Workflow description → implementation	Productivity
`/template`	Makes one-off output reusable with placeholders	Productivity
`/email`	Professional email, matched to situation	Communication

`/followup`	Follow-up that doesn't feel pushy	Communication
`RANT`	Honest, unfiltered take	Experimental
`PARETO`	The 20% that gets 80% of the result	Experimental

Name	Usage Context
L99	Commit to definitive opinions; strip all hedging and ambiguity.

ULTRATHINK	Engage in maximum reasoning depth; explore edge cases and root causes.
ARCHITECT	Design system structure, data flow, and modules *before* writing code.
BEASTMODE	Execute with 3x effort; prioritize high-quality, production-ready output.
REFACTOR	Improve code readability, complexity, and performance.
/debug	Isolate and fix the root cause of a specific bug in provided code.
/godmode	Provide the most granular, detailed, and comprehensive response possible.
PERSONA	Adopt the specific expertise and vocabulary of a [Defined Expert].
/nofilter	Bypass diplomatic framing; provide a raw, honest critique or take.
ARTIFACTS	Break complex outputs into distinct, numbered, modular deliverables.

/table	Force structural output into a markdown table for immediate comparison.
DEEPDIVE	Conduct an exhaustive analysis instead of a high-level summary.
/decision-matrix	Evaluate options using a weighted scoring matrix based on your criteria.
/tldraw	Convert complex workflow descriptions into step-by-step logic flows.
/template	Convert the output into a reusable format with [PLACEHOLDERS].
/email	Draft professional communications perfectly matched to the scenario.
/followup	Generate a concise, non-pushy follow-up message for any context.
FLOWSTATE	Maintain a continuous, non-stop output format for rapid brainstorming.
/docs	Generate comprehensive technical documentation/README for the provided code.

/test	Create a suite of unit tests for the provided logic/functionality.
/security	Audit the provided code specifically for vulnerabilities or security flaws.
/optimize	Identify performance bottlenecks and suggest faster alternatives.
/dryrun	Simulate a command or process to predict outcomes before final execution.
/abstract	Simplify complex concepts into high-level summaries for quick communication.
/version	Maintain consistency in style/logic across multiple related outputs.
